SUMMARY

I am a recent software engineering graduate with a solid foundation in programming language. I'm passionate about learning, eager to contribute to collaborative projects, and committed to building innovative solutions while continuously adapting to new technologies in dynamic environments.

ACADEMICS

Year	%Obtained	Degree	Institute
10/2020 to 06/2024	6.46 CGPA	Bachelor of Technology in Computer Science and Technology	APJ Abdul Kalam Technological University, Thiruvananthapuram
06/2018 to 07/2020	70%	PCMB	AKSGHSS Malappattam, Kannur
05/2018	60%	Xth	ITM Public School, Kannur

CORE TECHNICAL SKILLS

Programming Languages: Python, C
Database Management: Oracle SQL, MySQL
Web Technologies: HTML, CSS, JavaScript
Framework: Django
Operating System: Windows, Linux
IDE & Tools: Experience with VS Code

OTHER SKILLS

- Basic Knowledge of MS Excel, MS Word & Power Point Presentation.
- Google Workspace (Docs, Sheets, Forms).
- Basic knowledge in Power bi and php.

CERTIFICATIONS AND COURSE COMPLETIONS

- PYTHON FULL-STACK - PYSPIDERS BASAVANAGUDI, BANGALORE

During my Python Full-Stack Development training at PySpiders, Basavanagudi, Bangalore, I gained comprehensive knowledge of web development. The course included frontend and backend technologies such as HTML, CSS, JavaScript, Python, Django, and MySQL. I worked on hands-on projects like an “OTT platform” and a “Personal Portfolio” website, applying concepts in real-world scenarios. This experience strengthened my skills in creating responsive and database-driven applications. It also boosted my confidence in debugging, problem-solving, and deploying web solutions.

- TECH BY HEART - CYBER SECURITY & ETHICAL HACKING

As part of my academic learning, I attended a 15-day internship in Ethical Hacking and Cybersecurity at Tech By Heart in May 2023. The internship introduced me to key concepts such as network security, penetration testing, and cyber threat analysis. I gained hands-on experience with tools like Kali Linux, Wireshark, and Metasploit. Through practical tasks and guided sessions, I learned how to identify and secure system vulnerabilities. This experience enhanced my technical skills and deepened my interest in the cybersecurity field.

PROJECT

- APDR : HYBRID FRAMEWORK FOR DISEASE PREDICTION

APDR is a web-based hybrid framework for disease prediction using Convolutional Neural Networks (CNNs) and deep learning. The system is designed for the early and accurate detection of Alzheimer’s, Parkinson’s, and diabetic retinopathy by analyzing medical imaging data. Implemented advanced preprocessing, feature extraction, and classification techniques to enhance diagnostic accuracy. Integrated a user-friendly interface for doctors and healthcare professionals to upload patient data and view predictions.

INTERESTS

- Sketching makes me more creative and detail-oriented.
 - Photography sharpens my observation and visual storytelling skills.
 - Travelling makes me adaptable and open to diverse perspectives.
 - Workout builds my discipline, focus, and mental resilience.
-
